PRÉFACE

L'or du continent, à hauteur d'œuvre

Ce recueil réunit les **49 produits** du projet AFRI — la nouvelle monnaie africaine continentale — et de son or numérique Komplete Coin, sous la marque Fii dani rossi. Trente œuvres proviennent du catalogue officiel komplete.ndiaye.info ; dix-neuf extensions, créées dans le même langage visuel, complètent la collection jusqu'au nombre plein de quarante-neuf. Chaque produit est présenté en rendu photoréalistes carré de 1024 pixels, avec un étiquetage luxueux, une typographie serif élégante et la devise du projet inscrite en lettres d'or.

La collection s'organise en **quatre univers** : la Monnaie (16 œuvres), le Banking (13 œuvres), la Chaîne (8 œuvres) et les Écrins (12 œuvres). Sous chaque image figure le **prompt ultra-détaillé en anglais** utilisé pour la génération — prêt à copier-coller dans tout moteur d'images — ainsi que sa description française. Les constantes de style sont immuables : fond noir mat profond, lumière dorée chaude en contre-jour, accent émeraude discret, rendu commercial d'exception en qualité 8K.

Le tableau ci-dessous donne la cartographie complète de la collection ; les fiches détaillées suivent, univers par univers, dans l'ordre du catalogue.
